Paippalāda Saṃhitā 4.15 To heal an open fracture: with a plant

To the well-known hymn Śaunaka Saṃhitā (ŚS) 4.12, the parallel of the Paippalāda Saṃhitā (PS) hymn 4.15 treated here, Whitney (1905: 166) gives the title 'To heal severe wounds: with a herb', but it appears that the charm was meant to be used specifically to heal open fractures. The Kauśika Sūtra (KauśS) (28.5–6, cf. the translations of Caland 1900 and Bahulkar 1994: 156f.) does not specify the nature of the ailment which the acts it enjoins to the accompaniment of ŚS 4.12 were meant to cure. Cf. further Bloomfield's comments on ŚS 4.12 (1897: 384ff.), where the later texts that explain the terse injunctions of the KauśS are also discussed.¹

Our present edition makes use of two new Orissa (Or.) mss., V/123 and Ku1, collated through autopsy: for a diplomatic transcription of Ku1, see the appendix below; the relevant folio-sides have been reproduced as figures I & II. We employ the usual abbreviations for texts and reference-works in our commentary. Our constituted text (with metrical indications according to the systems of Zehnder 1999/Lubotsky 2002) contains the two emendation markers + (for emendations attributed to the archetype ms. underlying the Kashmir and Orissa transmissions of the PS) and * (for conjectured readings that were already corrupted in that archetype). The following editorial symbols and brackets are found in our critical apparatus and in the appendix: a sign, to mark explicit virāma; a dot · for illegible akṣaras or parts thereof; {...} around akṣaras or vowel elements thereof deleted by the scribe; (...) around material appearing interlinearly or in margine, where plain + marks additions and → corrections; CAPITALS for uncertain readings; [...] around editorial observations on the preceding reading(s). Bhattacharya's critical apparatus (1997) is not a so-called positive apparatus (West 1973: 87 n. 14): manuscripts whose readings are to be inferred from his negative apparatus appear between [...] in our positive apparatus; readings that are explicitly reported by Bhattacharya are treated here as those from our own mss. For our sigla of Or. mss., cf. Griffiths 2003; K is our siglum for the Kashmir ms.

Barret, Raghu Vira, and Bhattacharya all read *majā majjīñā* in K. Bhattacharya edits *rāstrasya*.

- **a.** Cf. Roth 1894: 102 = 1994: 630, where this specific example is quoted, on the 'Rechtschreibung' $j\tilde{n}$ for $jj\tilde{n}$ in Vedic mss.
- c. The Or. reading *rāṣṭrasya* is impossible. We follow **K** *māṃsasya*, which is also the reading of the ŚS. The reason for the corruption in the Or. mss. is unclear to us: influence of 18.15.8d *saṃ te rāṣṭram anaktu payasā ghṛṭena*?
- d. Although párvan- and párus- originally formed one paradigm (cf. Hoffmann 1974: 19ff. = 1975: 331ff.), they have become two different words already in the oldest Vedic. It is then only to be expected that they are also semantically distinct: párus- usually refers to the joint proper, whereas párvan- denotes a piece between the joints, and is thus often synonymous with 'bone'. This may explain why it is here used instead of ŚS ásthi. On the connection between majján- 'marrow' and párvan-, see RV 10.68.9cd býhaspátir góvapuṣo valásya nír majjánaṃ ná párvaṇo jabhāra 'Bṛhaspati took [the cows] of the cow-boasting Vala, as the marrow from a bone' (cf. b. Since metrical lengthening does not come into question before a consonant cluster, we should — rather than Bhattacharya and ŚS kalpayā — read kalpayāt (as in stanza 5), with common simplification of the cluster ttv to tv (Roth 1894: 102 = 1994: 630). Neither Sāyaṇa and the padapāṭha, nor modern editors of the ŚS have recognized this reading: all have assumed a 2sg. impv. (with abnormal lengthening) instead. Cf. Whitney's comments ad ŚS 4.12.5: "The prolongation of the final vowel of a pāda is so anomalous that we can hardly help regarding kalpayā in a as wrong, perhaps imitated from b". What is the difference in meaning between the words cárma- (2d) and tvác-here?

c. The PS version is clearly better than that of the SS.

³ The mss. of the KauśS (Bloomfield 1890: 78 n. 15) give *rohini* in the pratīka, as does Dārila ad 28.14 (Diwekar e.a. 1972: 94).

Note the double entendre, playing on rohita-(f. rohiṇī-) 'red'. Do we have a reference to cicatrization: a fresh 'red' scar?

provides the solution for the problematic hemistich \$S 19.2.5cd *yáthaivá tṛpyate máyas tás ta á datta bhesajíḥ*, which had been emended by Roth & Whitney to *yáthaivá tṛṣyate máyas tás ta áhrutabheṣajíḥ*; cf. Whitney's comments on the passage.

On dyuttá-, cf. further ŚS 12.3.22 pṛthivíṃ tvā pṛthivyắm ấ veśayāmi tanūḥ samānī víkṛtā ta eṣā | yádyad dyuttáṃ likhitám árpaṇena téna mấ susror bráhmaṇāpi tád vapāmi 'Thee that art earth I make enter into earth; this like body of thee [is] separated; whatever of thee is burnt (? dyuttá), [or] scratched by driving (árpaṇa); with that do not leak; I cover that over by a spell (bráhman)' (Whitney). This corresponds to PS 17.52.3 [PSK 17.38.3], which we tentatively edit: bhūmyāṃ tvā bhūmim adhi dhārayāmi tanūḥ samānī vikṛtā ta eṣā | 'yadyad *dyuttaṇ⁶ likhitam arpaṇaṃ ca tena mā susror api tad 'vapāmī'.

b. We read asthi with K, against Or and ŚS ásti. As indicated by Bloomfield (1897: 387), the copula here is superfluous, and we get the parallel constructions śīrṇam asthi (cf. the previous stanza) and dyuttam peṣṭram.

The word *péṣṭra-* only occurs here, at PS 17.21.1 asri māmsam tvacam pestram mastrhanam *majjñah śarīram | agnih kravyād *attv *amuşyāmuşyāyāṇasyāmuṣyāḥ putrasya, and at \$\$ 6.37.3cd (P\$ 20.18.5cd, RVKh 4.5.18cd) súne péstram ivávaksamam tám práty asyami mrtyáve. PW, pw assume that péṣṭra- means 'Knochen', which Whitney (1905: 167) rightly rejected as "altogether unsatisfactory", and tentatively replaced by 'crushed' ("as if from piṣ") in his translation. Hillebrandt (1885: 102) had connected the word with the same root, but arrived from there at the meaning: 'losgeschlagenes Stück Fleisch, Fleischfetzen'. We adopt Hillebrandt's translation which allows to connect the word rather with piśitá- n. and peśī- f. '(cut up) meat' (cf. Bloomfield 1897: 387f.; AiGr. II/2, 702f.; EWAia II, 168 and 170). The SS 6.37.3cd passage can then be rendered 'I throw him (who curses us) to Mrtyu, like a piece of burnt meat to a dog' (assuming with Sayana that ávakṣāma- means 'avadagdha', which is the most probable analysis of this word anyhow: cf. AiGr. II/1, 196; II/2, 750f.). We translate PS 17.12.1: 'Let Agni, the eater of bloody flesh, eat the blood, the flesh, the skin, the meat, the brain, the marrows, the body of N.N.,

Bhattacharya edits *tvā<u>ra kāṭā</u>t* and divides pādas **ab** *kāṭāt/patitvā*, but notes in his critical apparatus that the pāda division is dubious ('sandig-dhaḥ').

ab. We assume that a 3sg. pf. ind. āra from ar 'to hit on' is found here. Cf. ŚS 5.22.6d (PS 12.1.8d) tắṃ vájreṇa sám arpaya 'cause her to clash with a vajra'. The construction thus is parallel to yádi váśmā práhṛto jaghāna of the ŚS. The meter remains somewhat unsatisfactory.

⁸ On *majjñaḥ 'marrows', cf. Zehnder 1999: 34. On mastrhan- 'brain', of which this mantra provides the precious first attestation in Vedic before KauśS 11.16, cf. Eichner-Kühn 1976: 23–25.

The meaning of *kāta-* (for which ŚS *kartá-* might be a hypersanskritism) is uncertain. Cf. ŚS 12.4.3 / PS 17.16.3 kūţáyāsya sáṃ śīryante śloņáyā kāṭám ardati | baṇḍáyā dahyante gr̥hấḥ kāṇáyā dīyate svám Ɓy a hornless one they are crushed for him; by a lame one he falls (? ard) into a pit; by a crippled one his houses are burned; by a one-eyed one his possessions are taken away (PS jīyate: are lost)' (Whitney). MS 3.12.12:164.1-4 mentions this word among terms for large bodies of water: dharṇasāya svāhā drávināya sváha prasaváva sváhopavāmáva sváhā síndhave sváhā samudráya sváha katáya sváharnaváya sváha sárasvatyai sváha visvávyacase sváhā subhūtáva sváhāntáriksāva sváhā. Dem Luftraum dich" die zwölf Ziegel der Wesenheiten' (Caland 1928: 69). Comparable lists are also found at KS 40.4:137.20-138.2 prasavāya tvopayāmāya tvā kāṭākṣāya tvārṇavāya tvā sindhave tvā samudrāya tvā sarase tvā viśvavyacase tvā dharnasāya tvā dravināya tvā subhūtāya tvāntarikṣāya tvā; VSM 16.37 námaḥ srútyāya ca páthyāya ca námah kátyāya ca nápyāya ca námah kúlyāya ca sarasyàya ca námo nādeyāya ca vaišantāya ca and 16.44 námo vrájyāya ca gósthyāya ca námas tálpyāya ca géhyāya ca námo hrdayyàya ca nivesyàya ca námah kấtyāya ca gahvarestháya ca.

It follows from these lists that $k\bar{a}$? refers to some deep water (a well?) and that the PS construction with an ablative ($k\bar{a}$? $t\bar{a}$ patitv \bar{a}) is hardly acceptable. We therefore emend to * $k\bar{a}$? $t\bar{a}$ in accordance with \$S\$. The corruption is possibly due to the influence of the ablative $v_r k_s \bar{a} d$ in the next pada.

c. The epithet dáśaśīrṣa- 'ten-headed' applies in the AV to a mythical Brahmin, who was a healer. Cf. Since the verb lacks an explicit object, emendation of yad to tad (cf. 5c) may be considered, but jad in the Or. mss. can only be interpreted as confirming K yad. As the text stands, yad must be a rel. pronoun with viriṣṭam.

Appendix: diplomatic transcription of PS 4.15 in Ku1

It has become common for Vedic scholars to work on texts without any knowledge of the (manu)scripts on which our editions are based, of the types of normalizations — departures from the manuscript evidence — that editors usually feel obliged to introduce into their editions, and of the dividing into words of rows of akṣaras that their work requires.

Especially little is known about manuscripts hailing from Orissa: despite the fact that all four Vedas have a (living) tradition in Orissa, manuscripts in Oriya script have hardly ever been used in the history of our discipline. It is therefore all the more felicitous that the editors of *Die Sprache* have agreed to illustrate our contribution with a photographic reproduction of the folio from the Orissa ms. **Ku1** which contains PS 4.15, and have agreed to accept a diplomatic transcription of its text in an appendix. On the peculiarities, orthographical and otherwise, of Orissa mss. (*in casu* those of the Paippalāda Saṃhitā), and for sources on the script itself, cf. Griffiths 2003.¹⁰

left unmentioned in that article, and was neglected in the diplomatic transcriptions contained in it. We do not feel it is necessary to distinguish the two in our critical apparatus. For the sake of legibility and intelligibility, our apparatus does distinguish \boldsymbol{v} and \boldsymbol{b} , a distinction that Oriya script does not in fact make and which we therefore eschew in the following strict transliteration.
